Patented Key Control through 2030

Experience a safer
and more open world

All facilities need patented key control to effectively secure exterior and interior openings. This strength of integrity allows security managers to have peace of mind when it comes to managing the system. Unfortunately, instituting a new key system is not always easy... or economical.

Medeco X4 is an economic and efficient solution to rekeying needs. Medeco X4 has one of the largest master key capabilities on the market, allowing facility managers to tie everything together under one key for ease, convenience and efficiency. Additionally, Medeco X4 easily retrofits into existing systems, significantly reducing installation time.

X4 BENEFITS:

Patented Key Control: Protect against unauthorized duplication of your keys.

Uses Existing Hardware: X4 is available in a large selection of retrofit cylinder formats that can be keyed into a single system

Quickly Change Cores: X4 provides quick and easy core changes in the event of lost or stolen keys

Can Be Master Keyed: Various X4 formats can be master keyed together, eliminating the need to replace existing hardware. X4 offers four times the master keying capabilities as similar style cylinders.

WHY MEDECO X4?

Retrofit: Eliminates the need to replace expensive door hardware. Saves money and saves time.

One key flexibility: One key can control various cylinder formats within the same master key system, offering enormous organizational flexibility

Patented Key Control: Legally protected key control and duplication, helping to ensure safety and security

Superior Master Keying: Millions of variations and the ability to key across different formats

Quality: Medeco is the standard in quality. Five decades of meeting customer demand, product and support

TECHNICAL INFORMATION:

- Utilizes the standard A2 pinning system in conjunction with a bitted slider locking arrangement which allows for more master keying capabilities for large master key systems. Up to 65,536 unique change keys in a 7-pin master key system on a single keyway
- ANSI A156.5 Grade 1 certification assures consistent quality for heavy use applications
- Expandable, simple master keying available in SFIC and LFIC, as well as standard key-in-knob/lever, mortise, and rim cylinders
- SFICs are available in six or seven pin cylinders, and can replace Best style cores
- Standard Medeco cams and tailpieces can be used on Medeco X4 cylinders
- Keys can be cut using many standard code type key machines such as the Pro-Lok Blue Punch, A1 Green Machine, the ITL 9000/9700, HPC 1200 and HPC Code Max

APPLICATIONS:

Great for retrofit situations, education, retail, office.

WHO HAS THE KEYS TO YOUR FACILITY?

Medeco believes in giving customers the greatest control over their security. All facilities need patented key control to effectively secure exterior and interior openings. This strength of integrity allows security managers to have peace of mind when it comes to managing the system. Unfortunately, instituting a new key system is not always easy... or economical.

X4 is the most economic and efficient solution. X4 has one of the largest masterkey capabilities on the market. This allows facility managers to tie everything together under one key for ease, convenience and efficiency. Additionally, X4 easily retrofits into existing systems so installation time is minimal.

X4 is the perfect security upgrade for small format interchangeable core (SFIC) installations for Best®-style systems. X4 can also be integrated in with Prox® and iClass® systems. In addition to SFIC cylinders, X4 is available in many other retrofit cylinder formats that can be keyed into a single system.

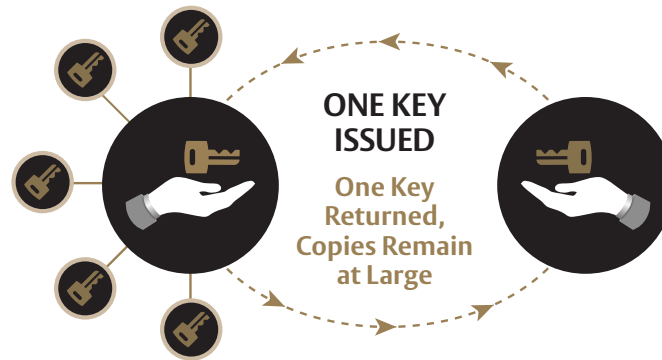

WHAT IS THE DIFFERENCE IN LEVELS OF KEY CONTROL?

- LEVEL 0 NO KEY CONTROL
- LEVEL 1 PATENTED KEY CONTROL

SECURITY BEGINS WITH KEY CONTROL

LEVEL 0 NO KEY CONTROL
Unpatented keys can easily be duplicated without your permission.

Ordinary keys can be easily copied at any hardware or discount store. Multiple keys often become unaccounted for over time, which can allow unauthorized access, either directly or indirectly.

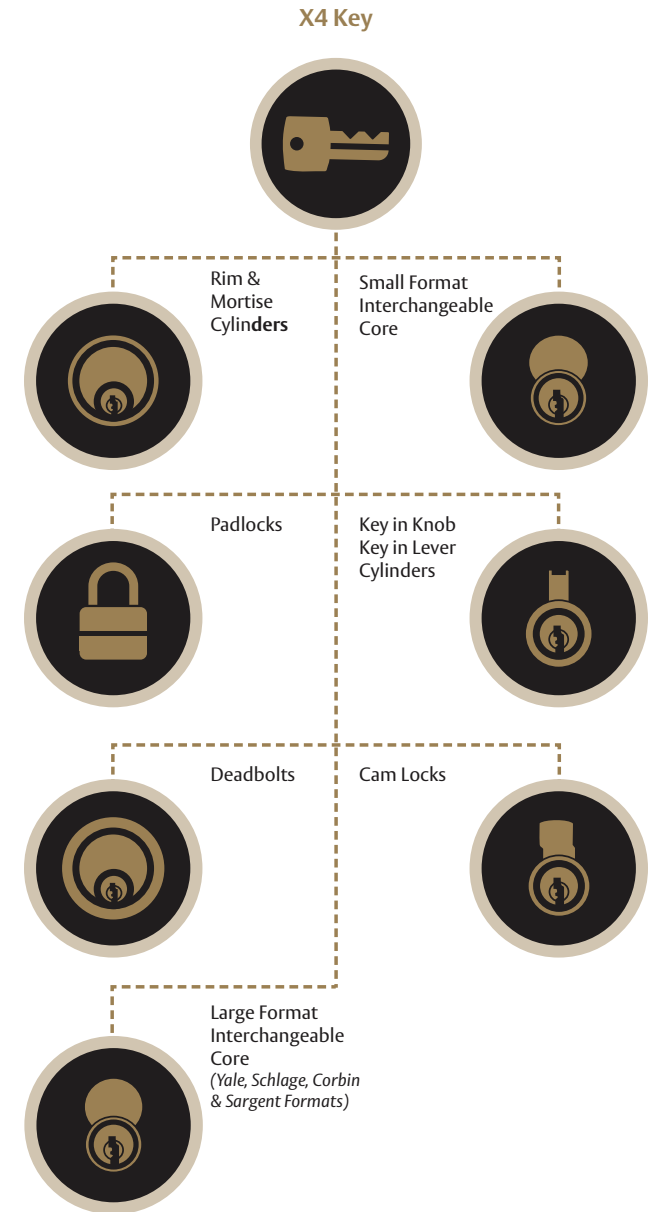

LEVEL 1 PATENTED KEY CONTROL
Ability to duplicate keys is prohibited without authorization.

Patent-protected X4 key control ensures that only designated people can duplicate keys, which effectively controls how many keys are issued and to whom keys are distributed.

ONE KEY FITS ALL

The X4 key can be masterkeyed into a system containing a variety of different lock formats to provide a one-key solution for your facility.

The ASSA ABLOY Group is the global leader in access solutions. Every day, we help billions of people experience a more open world.

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, businesses and institutions. Our offering includes doors, frames, door and window hardware, locks, perimeter fencing, access control and service.

THE X4 SECURITY SOLUTION

X4 offers a wide variety of retrofit cylinders, including SFIC. The patent life extends through 2030 and offers four times the masterkey capacity of similar-style cylinders.

Patented Key Control—Protects unauthorized duplication of your keys.

Uses Existing Hardware—Medeco offers the largest selection of retrofit cylinders, which will reduce costs by eliminating the need to replace your existing hardware.

Superior Masterkey Capabilities—Four times the masterkey ability of similar-style cylinders.

A facility's locking system is only as good as its key control. The next time you need a key duplicated, consider the risk of a security system that has no key control protection. If your keys can be copied without authorization, upgrading to patented key control like X4 will ensure your key system is protected for years to come.
